2017 Haul Out Boat Stands Sale

MOTOR BOAT STANDS

Brownell Motor boat Stands are designed to be placed under the flat chines of powerboats. Always use Keel Supports with boat Stands. **Tops included.**

- Solid American Construction
- Wide Variety and Adjustability
- Solid Steel ACME threaded center rod for smooth adjustment under load
- 8° top plate articulation in all directions
- Can be stacked for convenient storage

**FALL
PROMO**

KEEL STANDS

We always recommend at least two keel stands placed on hard stable ground to carry the boat's weight. Keel stands are quick to install and are adjustable utilizing the acme threaded rod, thus reducing labor and saving money.

- One keel stand is recommended for each 20,000 lbs. / 9,100 kgs of vessel weight
- Makes complete bottom painting easy without lifting the boat

Tops included.

LARGE BOAT DISPLAY STAND

- Unique four pad design reduces stress on the hull
- Unobtrusive design eliminates the potential "tripping" hazard of stands in the showroom. The design also maximizes showroom space because boats can be displayed very close together
- Accommodates dead rises to 45°
- No scratch, no slip TCL pads
- Ideal for boats up to 25' - 45' up to 35,000 lbs, each unit rated to 20,000 lbs. / 9100 kg
- Suitable for most popular brands
