

Founded in 1903, Michigan Wheel is an industry leader in the design and production of marine propellers. Our high-quality, innovative products are marketed to both the OEM and aftermarket.

Our philosophy of utilizing the latest in manufacturing processes has made Michigan the standard by which the industry judges excellence. Such manufacturing integrity means that in the future, as in the past, you can depend upon Michigan Wheel - where breakthroughs in propeller technology begin.

THE MOST COMPLETE LINE OF OUTBOARD AND STERNDRIVE PROPELLERS IN STOCK AT C.C. MARINE DISTRIBUTORS

C.C. MARINE
DISTRIBUTORS INC. 

WHY MICHIGAN?

Our propellers are manufactured with **superior alloys**, which provides superior performance and greater repairability.

State-of-the-art die cast manufacturing process ensures that each blade has been produced to the same precise weight, pitch, and diameter specifications.

A domestic supply results in a **tighter quality control** and ensured reliability, along with shorter lead times.

Streamlined Michigan Wheel Prop Selector makes propeller recommendations quicker and easier.

Comprehensive product line, offering a complete range for 3 HP through V6/V8 sterndrive, including many propellers not offered by other manufacturers.

OEM-equivalent blade geometry of the Michigan Match propeller provides performance equal to, or greater than the OEM propeller being replaced.

With over a century of manufacturing propellers, Michigan Wheel has a **wealth of knowledge in propeller design**.

OUR PROPELLERS

With OEM-equivalent blade geometry, Michigan Match propellers provide performance equal to, or better than the propeller being replaced.

Featuring high-performance blade geometry, and utilizing the XHS Hub System, Vortex propellers are a great choice for replacement or propeller upgrades.

The most economically priced stainless steel propeller, Apollo propellers offer all-around top performance without the sticker shock.

Long thought of as a performance bass boat propeller, Ballistic propellers provide unparalleled performance on a variety of hull types.
