

SIERRA[®]

PARTS THAT KEEP YOU MOVING.

IMPROVED HOUSING

In order to prevent water intrusion, Sierra's new line of starters are designed to seal off the internal components from the extreme elements found in the marine environment.

DUCKBILL VALVE

Preventing corrosion is vital to the reliability of your starter. Should moisture find a way into the housing, Sierra has incorporated a one-way valve and relief cuts to remove moisture and prevent water accumulation.

PAINTED SURFACE

The starter housing is painted to prevent rust and corrosion on the exterior surface while keeping your starter looking like new after many years of service.
